

PURAQUA™ CLB 800 Granular Coal Based Activated Carbon

Manufactured from selected grades of bituminous coal, PURAQUA™ CLB 800 is a high performance granular activated carbon made by steam activated process. It has excellent combination of micro and macro pores so it can be effectively being used in various applications. It is manufactured from specially selected coal which has less ash content so resultant carbon has very low ash content and product is much cleaner. It is effectively used in POU and POE applications. It is also very effective in de-colorizing in food and beverage industry, waste water treatment and various other applications.

SPECIFICATIONS

Iodine Number (mg/g) (Min.)	800
pH	9 - 11
Hardness (%) (Min.)	90
Total Ash Content (%) (Max.)	15
Moisture Content (%) (Max.)	5
Density (Kg/M3)	450 - 530

APPLICATIONS

Residential water treatment systems
Municipal water treatment systems
Chlorine removal
De-colorization applications

FEATURES

Good adsorption capacity
Low dust and turbidity
Good Hardness
Excellent combination of micro and macro porosity

PARTICLE SIZES

8x30 mesh (0.60—2.36 mm)
12x40 mesh (0.43—1.70 mm)
Other particle sizes available

PACKAGING

25 Kg/ 500 Kg Bag
Customized packing available
